

I Just became a member of XM Radio. The reason I switch is that I got sick and tired of listening to more than 20 min of commercials in an hour of listening to FM radio. Not only that, but I was only limit to about 2-3 stations that played the music i wanted to listen to. The rest was just Rap(overplayed). Also, They typically covered the weather and traffic when either it was Rush Hour or when the weather was bad. If you happened to miss it, well you would have to listen to some music and more commercials(about 45min) before you could hear it again. With XM Radio, something I pay for and that I choose to listen to, has stations dedicated to Weather and Traffic. If I happed to miss something then "HEY!!" I don't have to wait 45min to hear it again. And miss some information that I needed to hear earlier. Not, only that, but who is the NAB to tell me and other Americans that we have to listen to only Am or Fm radio. If something new comes out (ex. Xm Radio) and i choose to pay for it's service and the features that come with it, that's MY CHOICE and MY RIGHT to do so. If XM Radio has the ability to offer it's customers Traffic and Weather, and they want it and they pay for it. GIVE IT TO US!!! I've worked for corporate business' and i know how they operate. They operate by telling the people what they need, then asking the people for what they want. Sure, everyone that owns a business or corporation is in it for the money, but if you have to create your own Association (NAB) or a security so that if any rival companies come up you can just knock them down. That's just wronge and in my book that's that borderline Monopoly!
